

Research and Development

To Research and Development

My name is Jeffrey Scott Flesher, I am a medically retired U.S. Air Force Staff Sergeant who was awarded 3 of the highest Achievement Medals for my service as an Electronics Engineer and Computer Programmer who improved the (E)F-111 by 30% and brought it in one year in advance ready for the Gulf War where it flew over 98% of the missions, after the war, I retrained as a Helicopter Crew Chief for Air Rescue and Special Operations and retired in Maintenance Operations Center known as MOC that sits below Command-and-Control Center in a bunker, and directs all Aircraft activity, and I was medically retired for medical conditions that later required the removal of my descending colon and many skin cancer operations since that time. I was born 14 January 1961 and I am 60 years old now, and not looking for Employment, but as an unpaid consultant for Science relating to my Ph.D. in Physics and Mathematics, you can use the Freedom of Information Act (FOIA) to get my Military Records, make sure to include my ASVAB Scores that show 99% for Mechanical, and close to it in Electronics, their tests are wrong not me, proving I have an IQ over 180, and why you would want to consider me as an unpaid consultant in my area of Expertise.

I have a Research and Development or R & D project that I want to work with your engineers on, this project requires advanced technology that only the Military and Aerospace should have access to, but has a real use in tracking exact locations on Earth by incorporating many different types of sensors and tracking the Sun, Moon and Stars in Real-Time, this machine I will call a Remote Sensor Machine, uses Mobile Embedded Technology based on a Single Board Computer, currently this market is dominated by Raspberry Pi, Arduino and other 8, 16 and 32 bit MCU and MPU's, and I need to move up to the latest in Technology for a Single Board Computer, but they do not exist at this time, and from all my research, no one is even working on anything remotely like what I have in mind, which is a battery operated high end mobile CPU that has horsepower when needed, but has all forms of Communications onboard, so Bluetooth, WIFI, Internet, Cellular and so on, with a UPS and NAS built into the same board, the concept is simple, something goes wrong replace the board, you can repair it later, getting the system back online is more important, and this allows a redundancy to be built-in.

I want to design a new generation of Central Processors Units or CPU's, based on adding an Arbitrary-Precision Math Unit or APU, that will give this CPU exact Math Calculations far better than Floating Point Units or FPU, this will mean this CPU has far more precision than any CPU that now exists.

Most people I have met over the years only believe in the Theories of Albert Einstein, and you can check my records, by the 3rd grade I had an Adult IQ over 180, and over means they have no way of testing this type of IQ, normal is 70, and retarded is 50, there is 20 points of IQ difference, so if you have a normal IQ, think about how much more Intelligent you are from anyone Retarded, now compare your IQ to someone that is 20 points lower than yours and understand that means they are retarded compared

to you, and Einstein only had an Adult IQ of 160 and that makes him Retarded to me, and he is so retarded, our Science is 180 degrees apart, in my Science Light is Static and Universe is Dynamic, and since Light has No Acceleration, I can say my science is based on Facts, whereas a Theory means it is not a fact nor the Truth proving only Retarded people believe in Theory.

Einstein took God out of the Universe, and why most people believe God does not Physically Exist, and mostly because Religion Teaches God is a Deity known as the name of one of many Angels that do not physically Exist, yet the Torah and Bible state God is All Light without Darkness, and anyone that is Intelligent knows this exists inside every Atom in the Universe, and why my Cousin Isaac Newton said God is the Force of Gravity since $F = MA$, and M is the Mass of the Neutrinos of the Atoms that contain God inside them, and it is Clear Light has No Acceleration, only the Neutrinos do, and my Cousin Benjamin Franklin said Lightning is Electricity, and Nikola Tesla said we are All Light Beings, and an Oscilloscope will prove our SOUL is Electricity, and since we know for a fact Electricity can make Light, we know Tesla was right, and since we know Light has no acceleration and that God is All Light without Darkness, we know Kepler, Newton, Galileo, Franklin, and Tesla were right, and Einstein could not be any more wrong about our Universe, but his Theory only applied to an Alternate Universe in an Alternate Reality and not our own, and only Intelligent people understand what I have written here, and why most normal people believe Light can move, because they are not Intelligent enough to understand the truth about the Torah and Bible which is found in Psalms 23 that those that follow a Shepard are Sheep and that is a Beast all Followers take the Mark of, and why most normal people buy and sell Electricity by the Kilowatt knowing it is our SOUL makes them all Satan, and why they Teach Ewe that God does not Physically Exist, knowing Light without Darkness does.

I am looking for someone that is intelligent enough to understand what I have written here, and will help me to set up a Research and Development Laboratory for me at home since that is the only place I can work, and I have no interest in Money, Patents, Percentages or anything dealing with Legal, since I am a Medically Retired U.S. Military, I know for a fact the U.S. Constitution was suspended in January of 1861 when the Federal Reserve Bank started collecting Money for the Loan Lincoln took out using it as Collateral, and why the Militia Legally Executed him for Treason, but the Military took over to stop another Civil War since that is how we lost it to begin with, and in 1933 the U.S. could not make the payment due to the Salaries and spending of Congress, so the Federal Reserve took over, and now the Constitution is suspended and the last Legal President was Lincoln since Treason can never be made to be Legal, proving all Laws in the U.S. are not Legal, and the Military took an Oath to Defend and Protect the Constitution and that means they must Execute everyone in the Country, so I want to set this R & R center on Land not owned by the Federal Reserve or falls under any Governments Laws since they are all illegal and treason, and I do not want to participate in their coming Religious War to purge Satan's Helpers sending them all to Hell, meaning to take their Soul and use it for a Copper Top Battery.

I want to build a machine that measures our Earths Magnetosphere and record all the Earth's magnetic changes, as well as Atmospheric changes since NASA said our Magnetosphere is decaying at a rate of 5% a year, by 2033 our Atmosphere will not have enough magnetic energy to hold it in, thus it will be

vented into open space, and all those satellites that orbit around the Earth will not be able to do that as it reverses its Polarity since all Magnetic Fields will not be able to since Gravity is what holds them there, and ours is based on our Magnetosphere that is decaying at a rate of 5% a year, so do the Math, and do not believe in retarded Science like our Earth has Iron in it so it creates our Magnetosphere, that is retarded, our Earth is not a Motor or Generator if it were it would be slowing down as our Earth's Magnetic field collapses but it is not, proving that is retarded Science.

My goal is to build a machine that can predict the very moment our Earth Reverses its Polarity and vents our Atmosphere into space, starting an instant Ice Age.

I want to build this R & D facility to withstand this coming Ice Age, so someone can continue the work on the Facility itself, which is not for me since my time is limited since I have cancer, but rather to build an R & D facility for the future of the human race since I do not put much stock into the Underground Cities built for the Rich and Famous to survive this event, think about it, thousands of tons of ice will cover these facilities and that ice will always be on the move, my concept should work, but no one is building anything remotely close to it, so my only goal is to build this R & D facility and the machine that will record the End of Time as the Torah and Bible predicted would happen, the Fish is a waveform that starts at the Mayan Calendar year 0 that is the same for the Gregorian Calendar year 1, so it is one year ahead of it, so in 2013, or 2012 years, the end of that Time known as Pisces the Fish and the beginning of the age of Aquarius, but the tail is the cut off for the End of Time Event, it is between the years 2019 and 2061, but NASA said 2033 is the deadline, so this facility must be ready by then.
